

Introduction to Programming II

Project Log

Project title:	Lofi MusicVis
Topic:	Final changes Week20
What progress have you made this topic?	
<p>After User input , the media controls have been simplified. The web page is complete and set up in a way that can be expanded later. I have taken much time to fix bugs and errors.</p>	
What problems have you faced and were you able to solve them?	
<p>After some user feedback , I needed to create a more simplified and more visually appealing user interface. I had to re-code the styling and look of it. I wanted to do more with it and add a click and drag feature, however because of time constraints I will not be able to. Debugging issues have taken a lot of my time and I will still be working on some.</p>	
What are you planning to do over the next few weeks?	
<p>Making sure that the code runs stable, and the program is easy to use. I will also be working on writing the report.</p>	
Are you on target to successfully complete your project? If you aren't on target, how will you address the issue?	

Unfortunately , there was a medical emergency in my family during this week. I had to spend more time away from the project. This means that a lot of finishing touches might not bne completed. Instead, I will focus on the program running without well rather than introducing more complexity.
