

# Introduction to Programming II

## Project Log

<b>Project title:</b>	Lofi MusicVis
<b>Topic:</b>	Creating UI . Week18
<b>What progress have you made this topic?</b>	
<p>I have created a user interface for media controls. I have also started creating a Webpage element to go around the canvas.</p>	
<b>What problems have you faced and were you able to solve them?</b>	
<p>I have faced bugs and errors whole creating the media controls. I could not solve the issue of creating a volume slider with p5.js that smoothly slides . I instead created a volume slider using create slider function and setting it to appear on a Dom element. I did create a song time duration slider using p5.js only. Further testing of functionality is needed.</p>	
<b>What are you planning to do over the next few weeks?</b>	
<p>The web page needs to be completed and styled with CSS. Once web page is completed, then I can begin user testing.</p>	
<b>Are you on target to successfully complete your project? If you aren't on target, how will you address the issue?</b>	

I seem to be on target with the back up plan. The original ideas had to be simplified.
